Valuable Land for Sale.

I WILL sell the farm on which I reside, known by the name of Indian Town, and containing about one thousand acres. It is situated in Charles Co. Md on Nanjemoy Creek near its mouth, about seven miles from Port Tobacco, and forty from Washington City. Few farms combine greater advantages than this; added to a fertility of soil equal to any in the country, it binds on the creek nearly two miles, which affords great facility in getting its productions to market, and precludes the necessity of much fencing; the creek affords in their seasons, fish and wild fowl in abundance.—The soil is peculiarly adapted to the growth of Tobacco, Wheat and Indian Corn, and the plaister has been found from experience to act on it admirably. There are now about 100 acres in clover, some of which is well set. The improvements are a new two story dwelling house 16 by 40 feet, kitchen, barn, stables, carriage house, with every other necessary out house, the whole in good repair. There is also a wind-mill in good order, the toll of which affords meal enough for the support of the farm.—Also, one other tract containing 115 acres in the forest, about three miles distant, entirely in the wood. There is a well of excellent water in the yard, and several springs on different parts of the farm. The premises may be viewed, and the terms known by application to the subscriber. Should the above farm be unsold on the 1st of Sept. next, I will lease it for a term of years.

Said negro Nick has a wife on Mr. Thomas A. Diggs's land, near Fort Washington, and is probably harbored in that neighborhood. I will give the above reward of Thirty Dollars, if taken out of the State of Maryland, and Twenty if taken in the State, more than ten miles from home—if within ten miles of home, Ten Dollars.

Mr. PEYTON,

and obtained a horse and gig on hire, as he said, to go to Ellicott's Mills, and return in the afternoon of the same day; and as he has not yet returned, there is strong reason to believe that his intention is to swindle me out of my property. He is about 5 feet 8 or 9 inches high, apparently about 25 or 30 years of age, of genteel appearance, and well calculated to deceive.

The horse is a grey, about 15 hands high, 9 or 10 years old, has a switch tail, a speck on the right eye, and moves swiftly. The gig has a green body, carriage and wheels black, the lining of blue cloth, red stuff top, linings, plated double—outside joints.

I will give the above reward for the recovery of the horse and gig, and the detection of the *scoundrel*, or 20 dollars for the horse and gig only, and all reasonable expenses if delivered to me, No. 26, North Liberty street, Baltimore.

For the prevention and cure o
BILIOUS AND MALIGNANT FEVERS
is recommended
HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, cheeks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Nervous Disorders, Consumptions, Lowness of spirits, Loss of appetite, Impurity of b'ood, Hysteric'l affection, Inward weaknesses and debility } Violent cramps in the stomach and back, Indigestion, Melancholy, Gout in the stomach, Pains in the limbs, Relaxations, etc.

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout, palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

Lee's Ointment for the Itch.

Warranted an infallible remedy at one application, may be used with perfect safety by pregnant women, or on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

Hahn's true & genuine German Corn Plaister.

An infallible remedy for corns, speedily removing them root and branch, without giving any pain.

The Genuine Persian Lotion,

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellent minerals, the basis of other lotions, and of unparalleled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c.

Hahn's genuine Eye Water,

A sovereign remedy for all disea[illegible] of the eyes, whether the effect of natura weakness o. of accident.

SAMUEL SNOWDEN,

MONDAY, JULY 6, 1818.

From the New York Evening Post.

The following document from the Spanish secretary of state, in Madrid, to Mr. Irving, is received here from such a source that its authenticity may be implicitly relied on.

To his excellency the minister of the United States.

SIR.—The necessary routine of all law proceedings, whereby truth may be upheld and justice fairly administered, has been the cause of my not previously anticipating a decision, you have so often requested, in favour of Mr. R. Mead, a citizen of the United States, and a prisoner in the castle of St. Catalini in Cadiz, as a defaulter, having constituted himself a creditor against the royal treasury, by means of a deposit made at the chamber of commerce of that city, but not in *effective cash*,* as was the agreement with and demanded by Mr. John M'Dermot, a subject of his Brittanic majesty. This complex affair which has so seriously occupied the consideration of the courts of justice and the ministry, has likewise from its commencement, called forth the attention of the king, my master; but his majesty was not able to proceed contrary to the established customs of the law, nor even decide, until he became perfectly acquainted with the nature of the process. His majesty, therefore, being desirous of giving indisputable proofs of his regard and esteem towards the United States of America, and of the lively interest he takes in every thing concerning their government, clearly manifested in the release of Mr. Mead; and being desirous that his royal determination should prove compatible with the causes that gave rise to his arrest, has been graciously pleased to ordain that the royal treasury pay the above mentioned deposit *in effective cash*, and for this purpose H. M. ordered the necessary instructions to be issued, which has been complied with. The cause of Mr. Mead's arrest consequently ceasing, his majesty has been likewise graciously pleased to restore him to liberty, ordering the suit to be carried on conformably to law, and by the usual course of justice. This benevolent decision will doubtless be gratifying to you, and satisfactory to your government, by the unfeigned testimony his majesty therein gives of his constant wish to cement more firmly the friendly relations existing between the two governments.—His majesty has ordered me to communicate this his royal order to you, requesting its transmittal to your government.

I avail myself of the opportunity of renewing to you my regard, and my sincere desire to prove serviceable to you God preserve you many years. Royal Palace, 22d April, 1818.

(Signed) JOSEPH PIZARRO.

His excellency the minister of the United States.

PHENOMENON.

Communicated by a gentleman of Cincinnati.

I was last week on a visit to the farm of Ichabod B. Halsey, Warren county. On this farm Mr. Halsey has lately built the walls of a dwelling-house of brick, made from clay of one of his fields, taken near the surface. The brick wall on its outer surface, is almost literally covered with *salt*, which appears to be increasing in quantity—the salt is of a white appearance, and very fine grain. Quere—Is it not extremely probable, that at or near the spot where the clay was dug to make these bricks, a body of salt water might be found: and how can we account for the fact of salt bearing so high a degree of heat as must have been used to burn these bricks (which appear to be as hard as bricks generally are) and yet not to be entirely dissipated? That the salt on the surface of these bricks is thrown out by exhalation, and not derived from the atmosphere, is clearly demonstrated by the circumstance of the upper part (say four feet) of the wall being built with bricks from another farm, on which no appearance of salt can be discovered.

ALEXANDRIA:
MONDAY, JULY 6, 1818.

The letter from Mr. Jefferson to Mr. Gardner of Washington, which appeared in the National Intelligencer of Thursday last, will be, or at least ought to be regarded with studious attention by every man in America; and its contents to be treasured up in every heart, to be ready on any future occasion that may occur, as a memorandum, or quick intimation to the public memory, where confidence may most safely be placed, and where national gratitude becomes as imperious a moral duty as any one article of the decalogue.

"No man," says Mr. Jefferson, addressing himself in that letter to Mr. Gardner, on the subject of the declaration of independence, then proposed to be published by him and Mr. Murray the engraver, "no man better merited than Mr. *John Adams*, to hold a conspicuous place in the design. HE WAS "THE PILLAR OF ITS SUPPORT" ON THE FLOOR OF CONGRESS, "ITS ABLEST ADVOCATE AND DEFENDER" AGAINST THE MULTIFARIOUS ASSAULTS IT ENCOUNTERED."

Let it be remembered, that that very Mr. John Adams was once denounced as a "*hoary traitor*"—and by whom?—Name it not in Gath!—And overwhelmed by our *free* press with public odium for the purpose of pushing him from the high station to which his services to the republic were considered by all honest men before that time as giving him a just title—and that those machinations against him so far succeeded as to send him in his latter days into retirement.—Now we find him, and that on authority which cannot be suspected, to have been "*the pillar of the support of our independence, and its ablest advocate and defender.*" A more direct charge of national ingratitude, or one more irresistibly established by evidence never was preferred. Can atonement be made, supposing the nation were willing? No, that is impossible—elevated above this earthly scene, though still living on it, the venerable president Adams now rather belongs to another world and state of things than to this. He can now have little political enjoyment but in retrospect—and all his mere worldly possessions belong not so much to himself as to his offspring. There the nation may turn its eyes with confidence—and there the gratitude to the father ought to be visited. Among those who form our present excellent cabinet, is one born under that *pillar*—swaddled by that *ablest advocate and defender*—twinned and rocked in the cradle with our infant independence, and imbued with the very strongest dye of our revolutionary principles. Fortunate country, to find yourself not only protected and guided through your infant struggles, and the casualties and mischances which cling to puberty, but in your insipient manhood, when the gristle of your state is rapidly indurating into bone—still sheltered and directed—still guided into the paths of right, and won from the ways of wrong and error, by the same master principles, and by the same mighty minds which originally ushered you into freedom and independence—still marching on to prosperity and grandeur under arms which held the shield over your infancy, and sustained you in your first helplessness and decrepitude. Who could have been sanguine enough to hope, and how unlikely indeed was the chance, on the day of the declaration of our independence, that the presiding chief magistrate of the government they were laboring to establish, and the next officer to him in rank and efficiency in the councils of the repulic, would at the end of forty years be, the former one of the chief champions of that great event, and the other the son and heir of him whom the nation owned as *the pillar of its independence*, imbued with the principles, animated by the bold republican spirit, and directed by the wisdom and experience of his father?

Fellow citizens, on the anniversary commemoration of our new national birth, pour forth libations of health and gratitude to the sire, for the good that he *has* done; and let them be sweetened to the palate and ingratiated to the heart, by confidence in the son, and by the hope which every public action of his past life has a direct tendency to encourage, that in that son the father stands renewed, and that when the latter shall be receiving the rewards of those virtues, on the fruits of which every individual American is now feeding—the former will, by a similar devotion of his life and labors to the public good, be establishing his title to the same rewards, and be winning from some future recorder the emphatical panegyric bestowed by Mr. Jefferson, of having been "the pillar of his country's support, and one of the ablest advocates and defenders of its independence."

[The above remarks were intended for Saturday.]

To the Editor of the Alexandria Gaz.

SIR—Whilst I acknowledge my obligation to you for the liberality and correctness of your *note* to a hasty essay, entitled "Indian Corn versus Wheat," published in your paper of the 11th of June last, I would respectfully request of you to correct two typographical errors therein. The quantity of land should have been 60; and the word *reticulated* for *articulated:* and it is moreover absolutely necessary to add the date, *February*, 1818, to render the subject more explicit. EXILE.

4th July, 1818.

Charleston, June 26.

By the arrival this morning of the schooner Alice, captain Ames, in 2 days from St. Augustine, we have been informed that intelligence had been received at St. Augustine of the approach of general Jackson with a view of reducing it into possession. Preparations were making to defend the town, which is garrisoned by between three and four hundred men only, and very indifferently supplied with provisions. The next mail will, in all probability, furnish some further particulars.

FASHION! LADIES!

A late London paper observes—"The present weight of a lady's fashionable dress, is exactly *five* ounces."

Sagacity of a Greyhound and Pointer.

A gentleman in the county of Stirling, kept a greyhound and a pointer, and being fond of coursing, the pointer was accustomed to find the hares, and the greyhound to catch them. When the season was over, it was found that the dogs were in the habit of going out by themselves, and killing the hares for their own amusement. To prevent this, a large iron ring was fastened to the pointer's neck by a leathern collar, and hung down, so as to prevent the dog from running or jumping over dykes, &c. The animals, however, continued to stroll out to the field together, and one day the gentleman suspecting all was not right, resolved to watch them—and to his surprise found that the moment they thought they were unobserved, the greyhound took up the ring in his mouth, and, carrying it, they set off to the hills, and began to search for hares as usual. They were followed, and it was observed that, whenever the pointer scented the hare, the ring was dropped, and the greyhound stood ready to pounce upon poor puss the moment the other drove her from her form—but that he uniformly returned to assist his companion when he had accomplished his object.

THE PAST AND THE FUTURE!

"History (says Bolingbrooke) is Philosophy teaching by example."

The growth of the North American family has been so astonishing, that no one in the Old world could have foreseen its present results.—The next idea is: what immense revolutions are wrapt up in the womb of the next century!

The first successful attempt to colonize North America with white people was about the year 1607, when Smith with a small band of two or three hundred settled at James-Town. It was but a speck upon the map of time, that has grown into such stupendous importance. It was an event, big with the fate of millions of human beings, though originally it was scarcely known beyond the bounds of the company that framed the expedition. When they pitched their tents at James Town, the perils and sacrifices of these early pilgrims were beyond computation. They were among the first white men who had met the copper colored Indian of North America face to face. The land was distributed among different Indian tribes, who were scattered over its surface, and depended materially for their subsistence upon the chace.

The first events of the new colony were those of hostility and war with the Aborigines. Wherever the white man went, he had enemies, open or insidious, to encounter; it was not the march of a triumphant conqueror over a conquered land—it was not over a way strewn with roses: But there was resistance, and assassination, and bloodshed. Almost every field, that was won, was acquired with difficulty and by the sword.—And yet it was through these toils and difficulties that America was to be re-peopled by Europe, and the present growth of the country was to be successively effected.

"We have seen them, says the Historian, laboring under the difficulties incident to colonies, struggling with the vice of a feeble and inefficient charter, and agitated by the broils of faction: we have witnessed the wonder excited among the children of the wilderness, by the color, dress, arms and manners of the strangers; and the alternate application of force and address, in subduing their fierce and inconstant spirits. A company transported all at once, as it were, from the world: composed of discordant and heterogeneous parts, establishes itself in the wilderness, the sovereignity of which it has to dispute with the wolf, and innumerable tribes of warlike families. Every moment it is in danger of perishing by famine, or the sword."—Yet this early colony is like the mustard seed of the scriptures: it has spread and will go on spreading, until its branches shall cover North America, and a hundred million of souls shall flourish in its shade.

There was a time when this colony did not exceed one hundred persons.—Let us consider what an immense growth hath sprung out of this humble beginning—not that every subsequent addition has grown directly out of this germ; not that every inhabitant that now lives in this continent is the descendant of the settlers at James Town; because we owe much to emigration; but, that to this germ, is indirectly owing the removal of every native of Europe, who was finally tempted by the success of the first and succeeding settlers to come to our shores.

In *two hundred years* what miracles have been wrought upon this land! The Indian population has disappeared on the sea board; and east of the Mississippi, it is rapidly melting away. And in place of it, what swarms of white people have appeared! what multitudes of towns find their place upon the map! what crowds of enclosures, and farm houses, and agriculturalists, meet the eye in every quarter! How many thousands of miles of roads pierce the country in every direction! How population thrives, and advances from era to era with a giant's strides!

In 1790, a census was taken of the United States, when we were rated at about 3,929,326; in 1800, at 5,308,666; in 1810, at 7,239,903.

Population has passed west, and seven new states since the establishment of our independence have been added to the constellation of American republics, viz. Kentucky, Tennessee, Mississippi and Louisiana, south of the Ohio river; and to the north of it, Ohio and Indiana—and in the eastern portion of the confederacy, Vermont. A law has passed to admit Illinois into the number of states; which will raise them to 21 states.

Looking at what has been done within the last 200 years, to what may we not look forward? If in 200 years one hundred persons have contrived to grow to such a number, to make so many roads, build so many towns, accumulate such an astonishing fund of wealth, what will not be done by near 9,000,000 of people?

In 1820 it has been computed that our census will embrace near 10,000,000 of souls. Our increase from 1790 to 1800, was at the rate of 35 per cent; from 1800 to 1810, at 36 per cent. Taking the average, the United States double their population in about 28 years. Making now a fair deduction for the diminution of ratio which may mark the future periods, estimating from 1820 to 1850 at 33, to 1840 at 30 per cent, and to 1850 at 27, then what follows? That

In 1830 we may have	13,300,000
1840	17,290,000
1850	21,958,000

And in 50 years from the present period, about 33 millions of people—In that period, Maine, Michigan, and another state in the North Western Territory; the Alabama State, and Florida State, to the South—besides Missouri State, and it is impossible to calculate how many others to the West of the Mississippi, will grow into the American Republic. Towns will spring up with an inconceivable velocity—and roads will penetrate the trackless forests of the West. The revolutions of fifty years stretch beyond the reach of of mortal eye—but it requires no prophet to predict their magnitude. I see it stated in the "*Enquirer*" that perhaps the Ontario is about to occupy the Mouth of Columbia river—In 20 years more we may see an excellent mail road from the Mississippi to the Columbia—and, my infant son may, if he lives to see his 50th year, behold the distance from the Atlantic to the Pacific approximated by a turnpike road.—Nothing can take place more astonishing than what has taken place—the next 50 years can scarcely present us with any thing more wonderful than the last half century has produced.

But our happiness depends upon ourselves. If we be wise, we may be happy. Preserve your *union* and your *liberties*, is the lesson which the past reads to our posterity. Be *free* and be *united*, and the world will be astonished as well as delighted by the prodigies you will accomplish. THE PRESENT TIME.

A Peruvian, who was deeply involved in debt, was walking the streets with a very melancholy air, when one of his acquaintance asked him why he was so sorrowful? "Alas!" said he, "I am in a state of insolvency." "Well," said his friend, "if that is the case, it is not you, but your creditors who ought to wear a woful countenance."

50 Dollars Reward.

RAN AWAY from the subscriber, about the 1st of June, a mulatto woman, by the name of LETITIA. She is about 23 or 24 years old; has the hair and complexion of an Indian; rather slender made, and about 5 feet 6 inches high. She has a remarkable cowlick in the front of her hair, which is very coarse though not very long. She has also on the side of her neck a mark of a much lighter color than the surrounding parts. Her husband is a mulatto man, the property of Daniel M'Chicheater, by whose persuasions I have reason to believe she was induced to elope, and by whom or some of his connexions, I have reason to think she is still harboured.

I will give the above Reward to any one who will deliver her to me or secure her in Jail, so that I get her again. Her clothing cannot be described, as she had a variety.

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from *LEE's MEDICINE STORE,* No. 46, Maiden lane, New-York, a fresh supply of the following valuable MEDICINES:

Hamilton's Worm-destroying Lozenges,

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of persons can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.
